

Introducing the world's first true multi-specialty portable color veterinary ultrasound system.

Ideally packaged for small animal veterinary applications, SONOVET PICO features color and power Doppler, Freehand 3D and cardiac imaging capabilities. And thanks to its compact design, it is designed to be with you wherever there is a power outlet. SONOVET PICO will provide you with optimal coverage in all fields of small animal veterinary.

Full-featured digital color imaging for your veterinary diagnosis.

SONOVET PICO is a full-featured portable digital color veterinary ultrasound system with virtually all of the imaging capabilities of a cart-based system.

- All-digital beamforming
- Cardiac imaging
- Color and power Doppler
- Freehand 3D imaging
- Harmonic imaging
- Trapezoidal imaging
- Multi-frequency function
- 256 frame cine memory
- Versatile probes

Beagle's Pulmonary Artery Bifurcation in Color Doppler

Canine's Left Ventricular Inflow in Color Doppler

Beagle's Left Adrenal in 2D

The right imaging tools for your specialty.

Equipped with latest ultrasound technologies, accurate software package and high performing probes, SONOVET PICO will assist you in reaching new heights in clinical aptitude.

Organize and integrate your workflow.

SONOVET PICO also offers seamless network integration with DICOM 3.0-compliant PACS systems, which will greatly increase your productivity and prolong the system usefulness.

Expand your imaging horizons.

SONOVET PICO features unbeatable combination of superb ergonomics, connectivity and expandability which makes it the most versatile portable ultrasound system available. And with an addition of a system cart, the SONOVET PICO will continue to expand your imaging horizons.
